

# MOCET Communicator™

Amazing HD audio quality from your iPad for home and office

IP3092

Model No : IP3092 Series  
\*Available in black and white

The MOCET™ Communicator is an innovative accessory designed to provide a superior audio and video experience for iPad™ users when running popular Social Networking apps including FaceTime™ and Skype™ from the iTunes™ app store. Simple to setup and easy use, the Communicator seamlessly integrates an HD VoIP phone with super wideband audio allowing you make and receive calls from your iPad while listening to music, watching movies and participating in video conferences with it's acoustically enhanced speaker system.

The MOCET Communicator incorporates high definition (HD) acoustic technology with noise-suppression and echo-cancellation through the integration of 3 high quality speakers and 2 microphones providing a superior experience for phone calls, listening to music, and video conferencing. And you can play and work all day with the fast charger for your iPad and iPhone (or other mobile phone).

The MOCET Communicator is supported by a free MOCET IP Commander™ app downloadable from the iTunes app store. Overall, it performs big screen and key control as an top hi-end IP phone. With the IP Commander of its link to a Web interface, user can configure or even download the firmware.

In-app purchases from IP Commander will add exciting new features and services including multiple line and call control, multiple DECT cordless handset support, home security and automation, and enhanced calling features like digital answering machine, instant messaging and other advanced services to extend the convenience and value of your Communicator over time.

Enhanced privacy, HD quality and comfort with handset and adjustable stand-a best BYOD

More enjoyable iTunes experience with acoustically tuned Hi-Fi stereo speakerphone for music & phone call

Play and work all day with the built-in fast charger (works for all iPad models and iPhones)
